Education

Netaji Subhash University Of Technology

Sept 2020 – July 2024

B.Tech

New Delhi, Delhi

Technical Skills

Languages: Python, Java, JavaScript, SQL

Backend Development: FastAPI, Flask, Node.js, Django, Microservices, Kafka, REST APIs, Distributed System, API Design

AI/ML: RAG, Langchain, HuggingFace, Ollama, Prompt Engineering

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, OpenSearch

Cloud & DevOps: AWS, Azure, Docker, Git, CI/CD

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

Concepts: Monolithic, Microservices, ETL, Distributed Systems, System Design, OOPs, Data Structures & Algorithms

Experience

Backend Development Engineer — Tata Consultancy Services (Client: TotalEnergies, Clever Energy)

Feb 2025 – Present

Pune, India

- Engineered scalable **Python backend services and REST APIs** for a real-time platform, processing **50K+ records/day** through a distributed **5-layer architecture**, with a focus on performance, reliability, and maintainability.
- Developed **Apache Kafka** producer-consumer pipelines, ETL workflows, and **RAG-based retrieval services** to enable efficient data ingestion and intelligent query responses while reducing processing latency by **35%**.
- Leveraged **Pandas** and **NumPy** for large-scale data preprocessing, feature engineering, and statistical analysis, improving data quality and reducing preprocessing time by **40%**.
- Designed and developed scalable **REST APIs** using **FastAPI** and **Flask**, enabling seamless communication between backend computation services and client applications.
- Optimized Python backend and database performance, increasing throughput by **25%**, while leveraging **Git**, **CI/CD**, and Agile practices to deliver scalable real-time solutions.

Software Development Engineer Intern — Courpedia

Aug 2024 – Dec 2024

New Delhi, India

- Developed full-stack applications using **Node.js**, **Express.js** with authentication, **REST APIs** and responsive UI.
- Built and optimized **Node.js/Express APIs with MongoDB** for efficient data management.
- Contributed to **Agile development** through debugging, code reviews, API integration, and performance improvements

Technical Projects

OptiStack AI Backend Performance Optimizer & RAG Platform (GitHub) | *FastAPI, TypeScript, Qdrant, RAG*

- Built a **RAG Incident Assistant** using **SentenceTransformers** & **Qdrant Vector DB** to perform semantic search over runbooks for automated root-cause analysis.
- Developed an Isolation **Forest ML model & NLP log classifier** using **Scikit-Learn** to detect real-time system anomalies and output fix recommendations.

Movie Recommendation System (GitHub) | *Python, FastAPI, Streamlit, Pandas, NumPy, Scikit-learn, AWS*

- Developed an end-to-end movie recommendation system using **Python**, **Scikit-learn**, **Pandas**, and **NLP**, analyzing **5,000+ movies** and achieving **95% recommendation accuracy**.
- Implemented NLP-based feature extraction using **CountVectorizer** and cosine similarity to improve recommendation relevance.
- Designed and implemented REST APIs using **FastAPI**, integrating recommendation models and deploying the solution on **AWS** for scalable production access.
